* HACCP compliant

CHARACTERISTICS

- Endorsed by the Griffon Poison Information Center.
- Multiple feed anti-coagulant rodenticide.
- Unique formulation.
- Reduced risk of secondary poisoning.
- Contains Bitrex.
- Weather resistant.

CONTROLS: Norway rat (*Rattus norvegicus*), Roof rat (*Rattus rattus*) and House mouse (*Mus musculus*).

APPLICATION:

PEST	DOSAGE
RATS	Place the bait blocks on or as close to the runs as possible, as rats seldom deviate from these runs to feed. Replace blocks as soon as they are finished and continue to do so until no more bait blocks are taken.
MICE	It is advisable to establish where the mice holes are and then to place numerous blocks in close proximity to the holes. Replace blocks as soon as they are finished and continue to do so until no more bait block is taken.

MODE OF ACTION: Repeated intake of small dosages is required for eradication of rodents.

PACKAGING: 85 g & 10 kg (1176 x 8,5 g blocks).
